TRAINING GUIDE

School ERP
Step-by-step screens

How parents, students and teachers use the school app on a phone and the website, with a picture of every screen.

Before you start

> **Use this guide in a class.** Each page has a picture of the screen and numbered steps. Follow the steps on your own phone or computer while the trainer shows them.

What is inside

Part 1: Parents	Mobile app (8 screens) and website (7 pages)
Part 2: Students	Mobile app (9 screens) and website (5 pages)
Part 3: Teachers	Mobile app (7 screens) and website (8 pages)

Two ways in

- **The mobile app** signs in with your **mobile number** (or email) and password. The app finds your school by itself.
- **The website** signs in with your email or username and password, at the address your school gives you.
- Both use the same password. Change it once and the other accepts it a moment later.

Good habits

- Never share your password. Sign out on a phone or computer that is not yours.
- If the mobile number on your record is wrong, the app cannot find you. Ask the school office to correct it.
- If something looks wrong, note the page name and tell the school office.

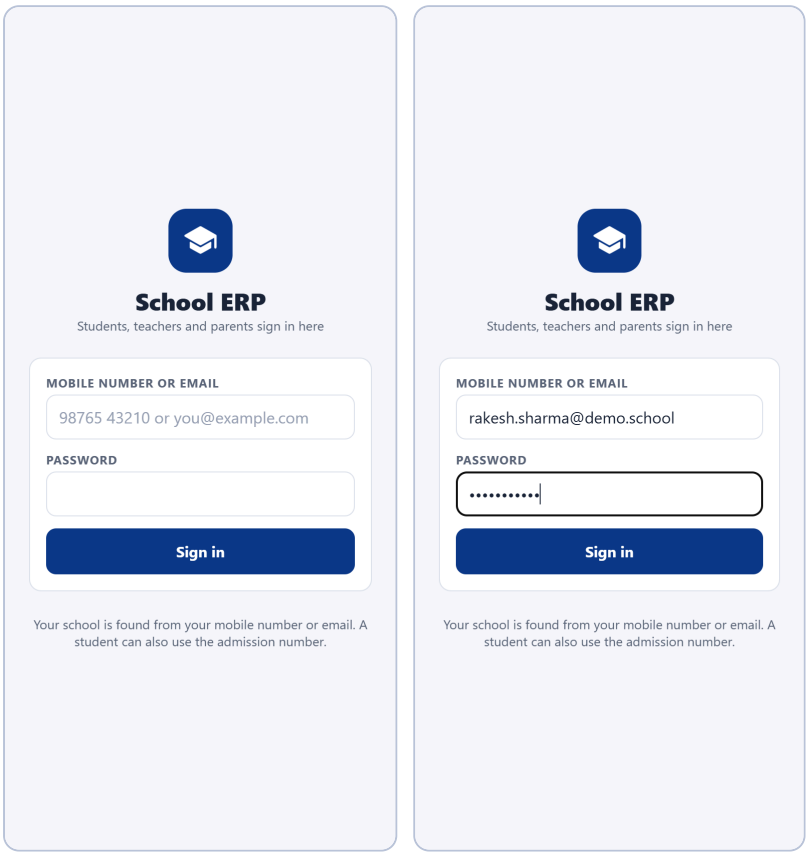

The pictures use demonstration data: a sample school, a student called Aarav Sharma and a class teacher called Neha Verma. Your school's names and numbers will differ.
